## How to Operationalize Compliance

- ✓ Identify High Risk Tasks
- ✓ Make sure they are performed correctly
- ✓ Its not enough to have policies and train
- ✓ Apply policy to operational tasks and job duties
- ✓ Focus on:
  - ✦ Risks
  - ✦ Controls
  - ✦ Procedures, Forms & Checklists
  - ✦ Monitoring
  - ✦ Auditing
  - ✦ Specific compliance trainings

**Use**

Risk Assessment to Operationalize Compliance

**And**

Your Auditors to Measure It

Compliance doesn't happen at the Program level, Risk level or Job-function level  
**IT HAPPENS AT THE TASK LEVEL**

## Integrating Compliance into Business Strategy - An Example

- ✓ **Start with a risk area.** Example - 'Anti Corruption'
- ✓ **Choose a process under that risk.** Example - 'Getting a License'
- ✓ **Map out tasks that people do in that process**
- ✓ **Remember almost all processes end with someone getting paid**
- ✓ **If you need help in identifying processes consult your auditors**
- ✓ **Pick one of the high-risk tasks in the process**  
(it'll either be a **front-line task that creates the risk** e.g. 'engaging a third party' or a **gatekeeper task that controls the risk** e.g. 'approving 3rd party invoice')
- ✓ **Give employees something to read while they are actually doing the task**  
(using a **checklist while doing a high-risk task** vs. memorizing the red flags may both help in being compliant - the former is more likely to ensure compliance **CONSISTENTLY**)
- ✓ **Monitoring and reporting** - auditing is the way to gauge effectiveness of a compliance program (auditing tasks helps measure what people do **vs.** what they remember or think)

### The TOOL vs. The JOB of Compliance

TRADITIONAL METHOD	OPERATIONAL METHOD
<ul style="list-style-type: none"> <li>❖ Do a risk assessment</li> <li>❖ Spend a year refreshing old policies</li> <li>❖ Then train everyone annually</li> <li>❖ Get the Compliance Officer to travel to all sites and talk about policies</li> <li>❖ Have the CEO talk about compliance at the company's annual meeting</li> <li>❖ Adopt best in class policy training</li> <li>❖ Hire a branding agency to create catchy slogans</li> <li>❖ Don't give people tools to use and apply compliance in day to day tasks</li> <li>❖ Keep promoting policy-level stuff</li> <li>❖ Assume sales and marketing will figure out how to apply policies</li> <li>❖ If not, they will call the HOTLINE</li> </ul> <p><b>Result: High rate of Non Compliance</b></p>	<ul style="list-style-type: none"> <li>➢ Do a risk assessment</li> <li>➢ Identify the riskiest activities handled by the company – Prioritize those</li> <li>➢ Postpone refreshing outdated policies until you handle critical aspects first</li> <li>➢ Realize you may have bad data, but you can still identify high risk activities</li> <li>➢ Provide task-based training for targeted employees and third parties</li> <li>➢ Provide checklists for tasks</li> <li>➢ Have preventive &amp; detective controls</li> <li>➢ Collaborate with Finance, HR, Legal to <b>monitor activities</b></li> <li>➢ Enlist internal audit for periodic checks</li> <li>➢ Move on to next highest-risk activity</li> <li>➢ Avoid "reactionary" compliance tactics</li> </ul> <p><b>Result: High rate of Compliance</b></p>

**DON'T CONFUSE the TOOL (Compliance Program) with the JOB (Mitigating Risk)**

### Seat at the Table for Compliance

- ❖ **Get past "paper compliance programs"**
  - ✓ Chief Compliance Officer (CCO)
  - ✓ Code of Conduct and Policies
  - ✓ Training (onsite and e-learning)
  - ✓ Monitoring and Reporting
  - ✓ Ethics Hotline
  - ✓ Status reports to Audit Committee
- ❖ **Does the CCO have a seat at the table** where organization's important business is discussed and decided?
- ❖ **Where is your CCO's Office?**

**CCOs need TANGIBLE & INTANGIBLE Indicia of Empowerment**
