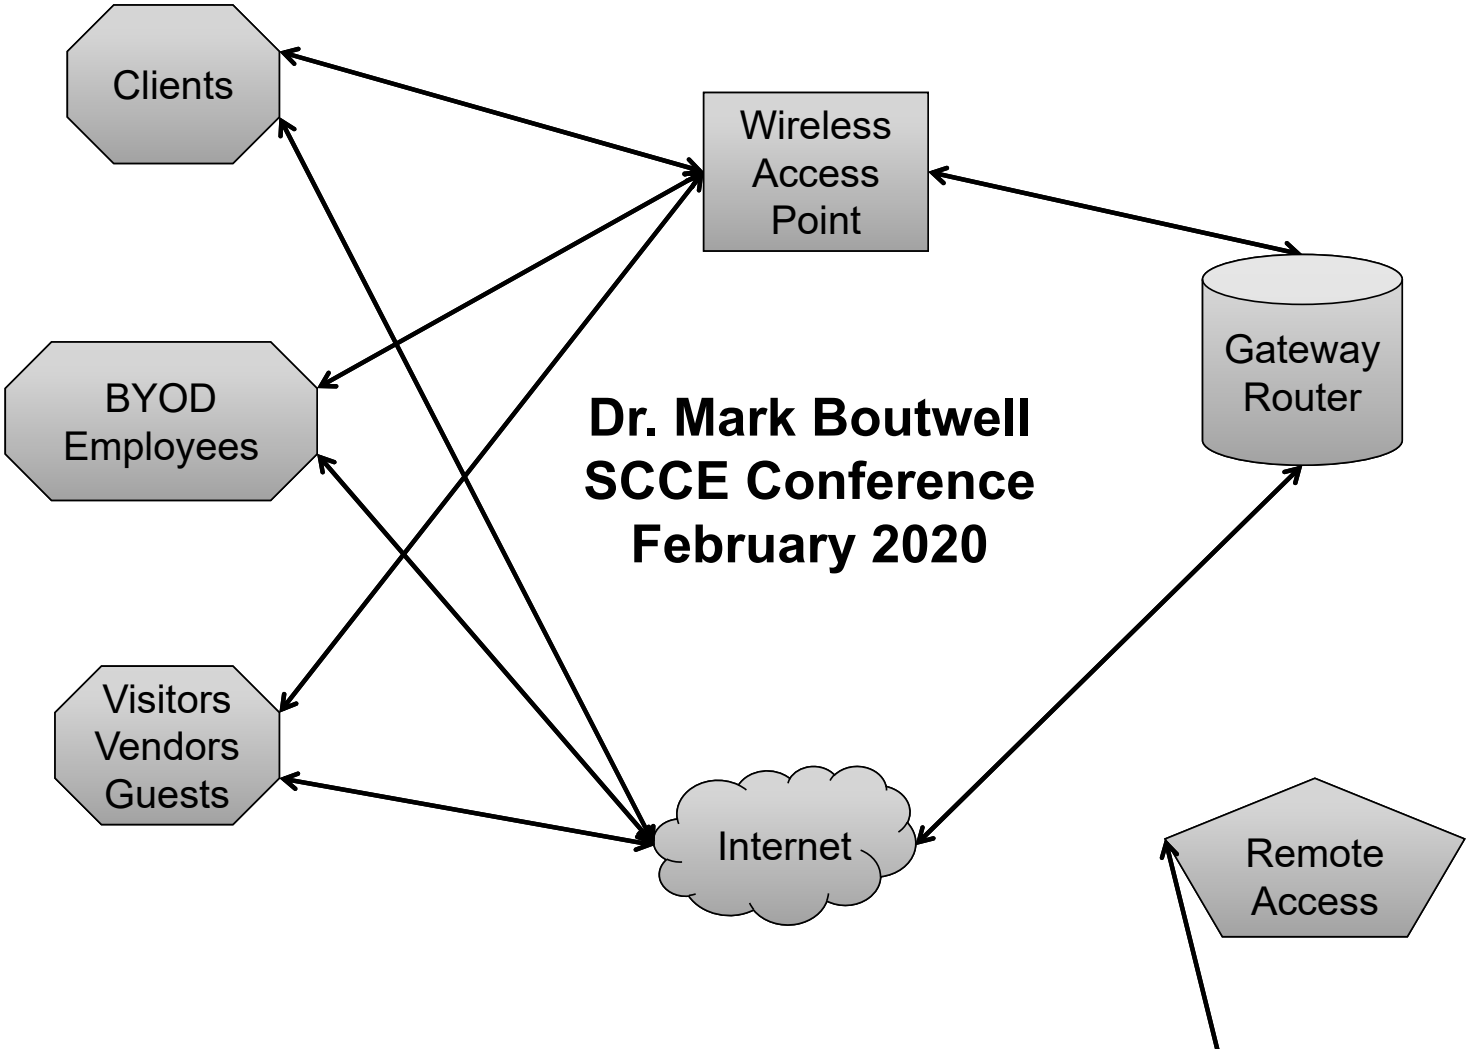
Cloud Computing and Mobility



Key Points

Advances in Software Development

Technology Convergence

Robust Training Program

Cloud Computing

Privacy

Data Integrity

Monitoring and Auditing

Mobility

Remote Access

Monitoring and Auditing

Device and User Preferences

Challenges to the Security Framework

Compliance

Complex Regulations

Overlapping and Conflicting Guidance

Lack of Standardization

Private and Public Clouds

Compliance and Cybersecurity Convergence

Cybersecurity

Network Architecture

Mobile Device Security

Software Applications

Training

Robust Threat Landscape

Delivery Methods

Training Design

Additional Topics

Internet of Things

Edge Computing

Vendor Security

BYOD

“A culture of collaboration is essential between the workforce and the compliance, cybersecurity, and training programs to achieve positive change.”
- Dr. Mark Boutwell
